Over 100 years of design, performance and innovation

Since 1896, Ideal Standard has become a world leader in bathroom design and manufacture through a combination of the highest quality design, innovative technology and skilled craftsmanship.

Live the Ideal brings together a collection of products representing the latest technology and engineering from across Europe. Many of our products contain innovative safety, water and space saving features to provide bathrooms equipped for modern day living. Each piece is the culmination of a lengthy development process involving some of Europe's leading designers. The result is excellence in form and function.

So for the complete bathroom, live the ideal with Ideal Standard.

Dual flush

Because you don't always need a full flush, all close coupled WC suites have dual flush cisterns. A long flush push button delivers six litres of water and a short flush button four litres. On average, a dual flush ensures 25% water savings if the short flush is used four out of five times a day per person.

Space – award-winning design

Designed by Robin Levien RDI, Space is a collection of innovative and award-winning designs. Now you can make more of your home by utilising spaces you didn't even know you had. Whether you want to adapt your family bathroom to help ease the morning gridlock, create a downstairs cloakroom or add an en-suite to your master bedroom, our state-of-the-art Space products will help you achieve it (below).

Innovation

Ceramic Disc technology

The revolutionary ceramic disc valve which has proved over the years to be the best and most reliable way of controlling water flow – without drips – was developed by Ideal Standard. This invention paved the way for innovative ranges of smooth operating single lever taps which can control both water flow and temperature with a single movement.

Robin Levien RDI

Robin Levien is one of Britain's most consistently successful product designers of the last 25 years. In 1999 Robin set up Studio Levien with his wife Tricia Stainton to design domestic products for leading companies all over the world. He was made non executive Design Director of Ideal Standard in the UK in 2003.

Studio

Launched in 1987, the award-winning Studio range designed by Robin Levien RDI, became the largest-selling bathroom suite ever, from any manufacturer. Today it is still one of Ideal Standard's most popular bathroom suites.

Ideal Waste System

Our ingenious new collection of First baths have a lower step-in height (only 48cm) designed to be easily accessible for everyone, particularly children and the elderly, whilst utilising the same amount of water. First features the Ideal Waste System, a low waste outlet that reduces the space underneath the bath (below). Also available on Concept baths.

Idealcast

The strength of cast iron with half the weight – Idealcast is a composite of resins and minerals, which is cast onto the reverse of a vacuum formed acrylic shell. This creates a very rigid product, comparable with the solid feel most people associate with cast iron, surpassing British Standard requirements for baths.

performance

Modern Collections

For over a century Ideal Standard has brought the simplicity and innovation of contemporary design into millions of homes. Good design is about both form and function. Ideal Standard leads the way through technological innovation and has realised the visions of leading European designers, each of whom refreshes the bathroom in their own way.

Sitting comfortably

Concept WC suites Choose a WC suite to complement your basin shape and bathroom style. With two modern bowl shapes and two cistern shapes there is plenty of choice. The Arc cistern is a perfect semi-circle, the Cube a neat square cistern. Both are dual flush and compatible with the cutting-edge clean lines of the Concept WC suite or the classic contemporary bowl of the Studio WC suite. There are close coupled, back-to-wall and wall hung models, all with the option of a slow close seat for added luxury.

- 1 Concept wall hung WC suite, wall hung bidet; Ceraplan bidet mixer.

- 7 Studio close coupled WC suite with Cube cistern.
- 8 Studio back-to-wall WC suite.
- 9 Concept back-to-wall WC suite, floor standing bidet; Active bidet mixer.

See p148-160 for the complete Concept range

Bathing concepts

Innovation

One small step

Concept baths offer easy bathing for all. At just 50cm high they're easier to step in and out of, but hold no less water than standard. The secret is in the Ideal Waste System, a concealed waste and overflow in one. Its plumbing reduces the wasted space below a traditional tub, lowering the height, and it's simply operated by an unobtrusive control on the rim of the bath.

See p148-160 for the complete Concept range

Concept

Above left: 170 x 70cm bath with Ideal Waste System. Cone rim mounted bath filler. Also available as a 170 x 75cm and 150 x 70cm bath.

Above: 170 x 70cm shower bath (right-hand) with Ideal Waste System, shower bath screen. Cone single lever bath filler, TT Cone built-in thermostatic shower valve, Outline shower kit; see pages 203-204 for the complete range of Cone mixers and taps.

Left: 170 x 70cm water saving bath (right-hand) with Ideal Waste System. Ceraplan single lever bath filler; see pages 207-209 for the complete range of Ceraplan mixers and taps.

Right: 170 x 75cm double ended bath with Ideal Waste System. Active dual control thermostatic bath filler; see pages 200-201 for the complete range of Active mixers and taps. Future access to bath fittings and waste required for this installation.

A water saving bath

Concept's water saving bath is the future of eco-aware bathing. For homes where water usage is an issue this bath's ingenious, softly sloping interior and tapered foot end reduce the amount of water needed to enjoy a deep, indulgent soak.

design

Concept Baths Four bath designs offer you everyday indulgence. Each bath has a gently sloped interior which echoes the inner soft rim of the Concept basins and makes them perfect for spa-style relaxation. There is a standard bath in three sizes, a double ended bath, a shower bath designed to maximise showering space and an innovative water saving bath as an eco option. All baths feature the new Ideal Waste System technology which provides a lowered step-in height for easy access.

Fitted...

Concept

design

A flexible solution to bathroom storage
Useful storage is a must in any bathroom. Concept furniture provides a home for all your necessities as well as hiding unsightly plumbing. The configuration options are endless – mix and match to your heart's content.

...or freestyle?

Concept Furniture

Concept's furniture is so flexible you can create the room you want in the space you have. You can combine elegant tall units with slimline base units, fitted storage for seamless ease or freestyle units for a contemporary look.

See p148-160 for the complete Concept range

Concept Furniture

The furniture solutions can help you create a 21st century bathroom. The design has options to solve all the complications of a modern bathroom. From storage pieces in contemporary finishes to fittings and accessories, your bathroom concept will fit your space and suit your taste.

Unlimited storage

Ample drawer space

Concept's design genius is in the details. Base unit drawers are deceptively large and on all Concept furniture you'll find slow close dampeners so doors will shut without a bang.

Multiple storage solutions

Wall mounted basin units give a smart free standing look. These can be combined with standard depth or slimline fitted furniture units to create the maximum storage space possible.

Space saving basin

In a small bathroom, corner solutions make the most of the space available. Concept's design offers the complete package. An Arc corner basin and chic wall-mounted basin corner unit increase the illusion of space and provide essential storage.

design

Clever storage
Clever storage can fit anywhere. This stylish basin pedestal unit uses normally wasted space under the basin, giving you unobtrusive, handy storage. Overhead mirrored wall units can create even more space – maximising the storage potential of your bathroom.

Open shelving
Some things in a bathroom don't need to be hidden away. Towels, toiletries and ornaments can help add that special finishing touch.

design

See p148-160 for the complete Concept range

Choice of finishes

Concept Furniture

A variety of finishes allows you to create a bathroom to match your home. Walnut creates a sense of luxury, Oak has a timeless classic feel and White Gloss adds a fresh, contemporary edge.

SX Dark Walnut

SO American Oak

WG White Gloss

UJ Walnut/White

UH Oak/White

See p148-160 for the complete Concept range

Mix and match

There are three finishes available in a choice of five combinations: Dark Walnut effect, American Oak effect, White Gloss, Walnut effect/White and Oak effect/White.

design

Concept

Sphere 43cm vessel basin, 500mm Sphere/Arc basin unit, tall unit with drawers (Oak/White effect), 500mm vessel worktop, worktop for tall unit with drawers (American Oak effect), 500mm mirror, 500mm glass shelf. Ceraplan single lever basin mixer; see pages 207-209 for the complete range of Ceraplan mixers and taps.

Concept

Ceramic tumbler with holder, soap dish with holder, 300mm towel rail, 400 x 700mm mirror, Arc 45cm handrinse basin and Ceraplan single lever basin mixer. See pages 159-160 for the complete range of Concept accessories. See pages 207-209 for the complete range of Ceraplan mixers and taps.

Cone

See p163-165 for the complete Alto range

Space

Designed by Robin Levien RDI, Space is a collection of innovative and award-winning designs. Now you can make more of your home by utilising spaces you didn't even know you had. Whether you want to adapt your family bathroom to help ease the morning gridlock, create a downstairs cloakroom or add an en-suite to your master bedroom, our state-of-the-art Space products will help you achieve it.

See p166-172 for the complete Space range

Space solutions

The Space concept is not just about innovative products – it's about inspiring you to look afresh at the space you have. Space aims to get you thinking about how you can reconfigure, convert or extend to create more versatile bathrooms. Space can help you make use of every nook and cranny, and all that vital extra storage that every busy household needs creates a bathroom that feels spacious and stylish.

Working all the angles

When space is at an absolute minimum and a shower facility seems out of the question, this compact Joy Pentagon infold shower enclosure can be the perfect solution. Below, the shower fits neatly into a corner and its triangular shape creates room to manoeuvre.

performance

No more unsightly plumbing

Beneath the base units there is a duct space to contain all plumbing. For aesthetic reasons the doors extend below the floors of the units. This ingenious solution gives proportions that look right while allowing sufficient height to accommodate a run of gradually falling soil pipe. Inside, the basin unit has a false back to cover the plumbing supplies and waste pipe.

See p166-172 for the complete Space range

Award-winning design

Space offers you maximum flexibility, and the Space WC is the perfect example. It has a seat that can be fitted in three positions – facing forwards, or turned 45 degrees to left or right. The angled seat allows the WC to be sited closer to a wall without making it too much of a squeeze. This simple, intelligent design was placed fifth in the BBC Essential Top Fifty product awards and the entire Space range was chosen as a Design Council Millennium product.

innovation

Making elbow room

In many small bathrooms, the basin often overlaps the bath and is too close to the WC because standard-sized products just take up too much room. The narrow basin is slimmer but longer than a standard one, so it provides the same volume as a full-size basin but occupies less wall space.

Dual flush

Because you don't always need a full flush Ideal Standard has developed dual flush cisterns (below). The flush plate has two buttons and sits neatly on the worktop. The small button delivers four litres, the large button delivers six litres. Four out of five times the short flush will be used saving up to nine litres of water per flush.

Made to measure

Scribing pieces (below) enable the furniture to be fitted wall-to-wall, neatly filling the available space.

Space planning

Space has been designed with your needs in mind. It gives you all the options to plan better bathrooms and add the extra facilities you need. Short-projection products help you make use of every available nook and cranny. Whilst in an ideal world it makes sense to have a separate shower as well as a bath, if you don't have room, the Space offset corner shower bath provides the next best thing.

See p166-172 for the complete Space range

Room to manoeuvre

The award-winning Space close coupled WC not only has a short-projection to provide maximum space, but the seat is also angled at 45 degrees so that the WC can be positioned closer to the wall and you will avoid burning your leg on the towel warmer.

Innovation

Small bathroom

In the small family bathroom below, the shorter projection of the WC and basin leaves a larger area in the middle of the room to turn around and use all the facilities with ease. The basin is teamed with a Waterways swivel spout basin mixer so you can push the spout to one side if you want to wash your hair.

Space

55cm short-projection pedestal basin, close coupled WC suite and 150cm shower bath (right-handed) with bath screen. For more bath options see pages 168-169. Waterways CD basin mixer with Tipu handles and bath filler; see pages 204-206 for the complete range of Waterways CD mixers and taps.

See p166-172 for the complete Space range

+

Fully fitted with extra shelf space

The back-to-wall WC suite can be installed against a wall or ducting. It can also be fitted to a slim WC unit from the Space bathroom furniture range which contains the cistern and introduces useful shelf space above it. To allow closer proximity to the wall with a 450mm WC unit, the seat is angled at 45 degrees.

design

Space

to breathe

Family bathroom

Originally there was no storage in this small family bathroom. The bath, basin and WC suite were squeezed in without a thought and supply pipes were glaringly visible. In the new design (below) the old configuration is kept but the Space products fit the space better and ugly plumbing is hidden inside the units. Space bathroom furniture provides additional storage and runs the full length of the right-hand wall, maximising shelf area.

Space

55cm semi-countertop short-projection basin, back-to-wall WC suite and 150cm shower bath (left-handed) with bath screen. For more bath options see pages 168-169.

Old bathroom

Space furniture in shaker white 450mm WC unit, 600mm basin unit, 750mm bath unit, 450mm wall unit, granite worktop, white plinth, see pages 169-172 for the complete Space furniture range. Ceramix basin mixer and bath filler; see pages 202-203 for the complete range of Ceramix mixers and taps.

Space Family bathroom

The family bathroom is typically squeezed into the size of a king-size bed! This means there isn't much room to turn around, never mind store anything. But Space products can transform an ordinary bathroom into something special – including somewhere to store all those bits and bobs.

Space En-suite

The Space range makes it easy to add the private luxury of an en-suite facility in many existing bedrooms. Just a little spare space, Space products and the corner of your bedroom can become a comfortable shower room, so you can avoid the morning rush hour in the main bathroom.

Space of your own

En-suite

Space corner products let you fit a stylish en-suite shower room into a space no bigger than a corner bath. There is room for a Space shower room in the majority of master bedrooms. The Space corner basin, WC and Joy quadrant shower enclosure and tray (right) form three sides of a triangle for a chic, practical shower room. The dimensions also allow for fitted wardrobes to be built in on either side, so your bedroom becomes truly elegant and functional.

Bedroom layout

Space

56cm corner pedestal basin, corner close coupled WC suite. Cone basin mixer; see pages 203-204 for the complete range. Cone accessories used throughout; see page 160 for the complete Cone range. 80cm quadrant shower tray, Joy Quadrant 80cm enclosure, Trevi Oposta includes shower valve and multi-function shower kit L6958AA, call 0800 590 311 for the Ideal Standard showers brochure; see pages 98-117 for more shower enclosures.

See p166-172 for the complete Space range

Using precious corners

The corner basin is another practical option for making use of awkward angles. In this triangular en-suite shower room it is combined with the close coupled corner WC suite to create a convenient, compact facility. No space is wasted which means the shower room will fit neatly into the corner of a bedroom.

design

See p166-172 for the complete Space range

Space

to grow

Creating the illusion of space

Installing a wall mounted WC in a small bathroom will create the illusion of space by leaving more of the floor and wall visible. It's also easy to keep clean, making it ideal for wet rooms as well as small bathrooms. Like the back-to-wall WC, the cistern is concealed behind a wall or inside a fitted unit.

design

Space Loft conversion

When it feels as if the house is about to burst at the seams, you can always think about utilising loft space. Maybe your teenager is longing for a private lair or you'd like to be able to put guests up in comfort. Whatever your requirements, it's an ideal opportunity to add an extra bathroom to ease the pressure in other parts of the house – so you can extend your options as well as your living area.

Loft conversion

A loft conversion puts the last – and highest – space in the house to good use, and the Space range turns it into the height of luxury. Headroom may be limited, but a small room under a sloping roof (left) can accommodate a shower bath and bath screen, a wall mounted WC and a short-projection basin without difficulty. The WC is positioned underneath the skylight to maximise headroom and the cistern and waste pipes are cleverly hidden for a clean modern look. This loft conversion contains a double bedroom with an en-suite bathroom.

Space

58cm short-projection pedestal basin, wall mounted WC suite, Studio 170cm shower bath (right-handed) with bath screen. Waterways CD swivel spout basin mixer with Tipu handles; see pages 204-206 for the complete range of Waterways CD mixers and taps. Cone accessories used throughout; see page 160 for the complete Cone range. Trevi Compact (CTV) built-in shower includes shower valve and Elipse multi-function shower kit, Trevi 45 twin impeller shower pump, call 0800 590 311 for the Ideal Standard showers brochure.

Loft en-suite bathroom

Hidden space

See p166-172 for the complete Space range

Cloakroom

The elevation (below) shows how the Space wall mounted WC suite can be installed to create a clean and tidy cloakroom where the cistern is hidden behind a wall. The double doors of the cloakroom open outwards for easy access and cleaning.

Staircase elevation

Space

40cm micro basin and wall mounted WC suite, Waterways CD basin pillar taps with Tipu handles; see pages 204-206 for the complete range of Waterways CD mixers and taps.

Cone accessories used throughout; see page 160 for the complete range of Cone accessories.

A small but perfectly formed handrinse

When you need to squeeze a cloakroom into the smallest of spaces the micro basin is a great solution. Combined with a Space WC suite, the short-projection of the micro basin allows you to create an extra facility that is so compact it can even be tucked away under the stairs. The basin has two tap holes and is available with or without its shroud.

design

Space Cloakroom

Most families would benefit from a downstairs cloakroom for visitors or dealing with kids. But sacrificing living space is usually unthinkable and an extension may not be an option. By using Space products, though, it's possible to fit a small, practical cloakroom under the stairs. Now you can open up tucked-away parts of the house that only used to be good for games of hide-and-seek.

Space Baths

In a small bathroom every inch of space is vitally important. Although a shower is more space saving than a bath, it can be less functional when it comes to bathing small children or unwinding at the end of a hard day. With Space baths you can achieve the best of both worlds – a relaxing place to bathe and shower without feeling cramped.

design

A solution for all the family

The shower bath combines a roomy showering area with a full-size bath to give you the best of both worlds. The bath screen folds inwards as well as outwards which makes it easier to use the bath when the shower is not in use, so children's bathtime need not be a struggle and a long soak is all the more relaxing. The bath is available in a left or right-handed version and in two sizes: 170 or 150cm.

Bathing space

Making the space you need

The cleverly curved Studio spacemaker bath has the width of a standard bath at the head end – allowing plenty of space for bathing – but is tapered towards the foot end to leave room for a basin, WC suite or towel warmer beside it. The plan below shows how the bath curves away from the basin so that the basin doesn't overhang the bath and is easier to clean around. The spacemaker bath is available in a left or right-handed version.

See p166-172 for the complete Space range

When a bath is a necessity

If your bathroom is too small for a full-size bath but you need a bathing facility – perhaps for small children – a 120cm bath is a good option. Small but perfectly formed, it can be combined with a shower screen to create a fully functional bathroom.

A shower bath for smaller spaces

The Studio shower bath widens out at the foot end beneath the shower, so it's great for bathing and showering in comfort. Its shower screen features an innovative deflector seal which directs water into the bath and prevents it from splashing out. The screen opens inwards and outwards for easy access and cleaning.

innovation

Space that works

Space Bathroom furniture

With a unique projection of 21cm, Space bathroom units can be fitted in almost any bathroom, opening up small spaces to a whole new world of high-quality design. Whether you are planning a new bathroom or modernising an existing one, Space furniture can make a real difference: storage problems are solved and unsightly plumbing is completely concealed. The end result is clean, modern and stylish.

See p166-172 for the complete Space range

Designed for the slimmest fitted units

This generous semi-countertop short-projection basin is designed to fit into the slim 21cm Space bathroom furniture range. In this plan it forms part of a fitted bathroom which provides shelf space and built-in storage. The basin is available with one tap hole in a left or right-handed position, or two tap holes.

design

Space
55cm semi-countertop short-projection basin and back-to-wall WC suite, Studio 170cm Idealform shower bath (right-handed) with bath screen, 450mm WC unit, 600mm basin unit and 750mm bath unit.

Bath panels

Bath panels complete the fitted look. Matching front and end panels are available in each of our six finishes: Maple effect, Gloss White, Shaker Maple effect, Shaker White, Oak effect (above) and Walnut effect.

design

Space

55cm semi-countertop basin, back-to-wall WC suite, 600mm basin unit, 300mm base unit and 600mm wall unit above 600mm WC unit in Maple effect. Ceramix basin mixer; see pages 202-203 for the complete range.

Space

55cm semi-countertop basin and back-to-wall WC suite, 600mm basin unit with 300mm base unit in Walnut finish; 450mm wall unit above 600mm WC unit in Walnut effect. Ceramix basin mixer; see pages 202-203 for the complete range of Ceramix mixers and taps.

Joy alcove pivot shower enclosure; Moonshadow base connection shower kit with Trevi Ascari shower valve; call 0800 590 311 for the Ideal Standard showers brochure; see pages 98-117 for more shower enclosures.

Right: 40cm micro basin and Studio back-to-wall WC suite, 450mm wall units above 300mm single door base unit and 600mm WC unit in Gloss White.

See p166-172 for the complete Space range

Planning your space

Clever storage

Glass-shelved wall units afford generous storage for toiletries and medicines. Doors need to have clearance for opening. Do not position wall units above the semi-countertop basin as there will be insufficient headroom.

design

Styles and finishes

There are six styles and finishes to choose from which can be combined with six different worktops to create your own individual look for an end result that is clean, modern and stylish. Worktops are supplied in a choice of lengths (1800, 1200 and 600mm) that can be cut on site to the exact size required.

design

Bathroom furniture

Available in a choice of sizes, styles and finishes, our bathroom furniture ranges are supplied ready-assembled for convenience and durability. Clean lines and practical features combine to conceal clutter and plumbing, creating a stylish, yet functional bathroom.

See p172-177 for the complete Bathroom furniture range

Ellison maple

Bathroom furniture

Style has not been overlooked with this Shaker style Maple effect bathroom. Whether in a contemporary or classic setting, Ellison Maple makes a simple yet aspirational statement.

JF Ellison Maple

Handles

With a choice of ten handles designed to complement all door styles, your bathroom can be as individual as you are.

A choice of worktops

Our bathroom furniture collections can all be complemented with a variety of worktop finishes: Matt or Gloss White, wood effects; Walnut, Maple or Oak.

Classic Collections

Ideal Standard's own heritage extends back more than a century. These classic designs are the products of experience, coupling period detail with technical expertise. So whether you have a traditional home or a modern apartment, this classic collection will help add style and opulence.

72 Plaza

76 Revue

80 Reflections

Plaza

With its crisp, angular detailing, Plaza evokes all the style and elegance of the new modernism of the 1930s. Designed by Dave Tilbury of Studio Levien, Plaza is flexible enough to be used in traditional or modern settings.

See p177-178 for the complete Plaza range

Plaza

58cm pedestal basins, 170 x 70cm Idealform bath; see page 184 for more classic baths. Plaza fittings used throughout; see page 212 for the complete Plaza mixers and taps range.

Plaza

Inspired by Art Deco, styled for modern living. The clean cut semi-octagonal lines and mouldings of the basin are echoed in the bath, bidet and WC suite, and are complemented by the coordinating range of taps and mixers.

Design by Dave Tilbury

design

The ultimate in indulgence

The distinctively crisp semi-octagonal shape, is drawn from the great age of bathroom luxury, when classical design influences combined with modern engineering for the first time.

See p177-178 for the complete Plaza range

Plaza
58cm pedestal basins and Plaza basin pillar taps.

Left: Close coupled WC suite, floor standing bidet. Plaza bidet mixer; see page 212 for the complete Plaza mixers and taps range.

Art Deco styling

Revue

Designed by Dave Tilbury of Studio Levien, the generous proportions and elegant lines of Revue are based on traditional forms, with simple understated mouldings that make it perfect for bathrooms with character and style.

See p178-179 for the complete Revue range

Revue

60cm pedestal basin, Traditional close coupled WC suite. Roll top 170 x 80cm Idealcast bath; see pages 181-184 for more baths. Kingston mixer fittings used throughout; see page 212 for the complete Kingston mixers and taps range.

Revue

Revue combines the best of the old and the new. The traditional upstands on the cistern and the basin lend old world charm to its generously curved lines which fit easily into any contemporary setting.

Design by Dave Tilbury

See p178-179 for the complete Revue range

Revue

design

Designed for ease of use

Concealed by an ergonomic flat cover, the waste is operated by a control conveniently positioned on the rim of the bath.

See p183 for more First baths

First is our ingenious new collection of baths that have a lower step-in height (only 48cm) designed to be easily accessible for everyone, particularly children and the elderly, whilst utilising the same amount of water for your ultimate comfort. First features the Ideal Waste System, a low waste outlet that reduces the space underneath the bath.

First baths

Hidden overflow system

The Ideal Waste System is a state-of-the-art plumbing system that features a special low waste outlet to reduce the space underneath the bath. The height of the bath is lower, but the water depth remains the same.

How it works

The patented system is based on the scientific principle of equal water levels in communicating vessels. The combined hidden overflow, waste and plug system is controlled by a simple open/close control on the edge of the bath. Instead of a traditional overflow hole, hidden behind the bath is a twin pipe overflow that is connected direct to the waste. When you fill the bath with water one side of the overflow pipe fills – exactly to the same level as the bath (See fig. 1). If you overflow the bath the water in one side of the overflow pipe will fill up and discharge over the bend and down the other side of the overflow pipe, directly into the waste system (See fig. 2).

innovation

Our whirlpool baths have been designed with powerful jets of warm water that soothe and caress tired muscles and joints, restoring the body through gentle massage. Each whirlpool system – Twin Plus or Basic has a different style of jet with its own distinctive features, providing an invigorating experience. A separate Whirlpools Collection brochure is available, call 0800 590 311 for a free copy.

Whirlpools

See p183-184 for the complete whirlpool range

Innovation

Twin Plus
Twin Plus uses minimalist aesthetics with a whole host of innovative features including multiple whirlpool jets that release streams of high pressure water for an invigorating experience. They have been purposely designed with a flat and smooth surface for extra comfort and easy cleaning. Alto Bath shown left.

Basic whirlpool system
Our Basic system offers a touch of luxury that everybody can afford. Easy to use, thanks to its digital starter and level sensor, its jets have adjustable volume and direction. The perfect partner to our Velox bath, it is an ideal introduction to a new way of bathing.

Roll top baths

An Idealcast roll top bath will be delivered with an external matt finish for you to decorate to complement your bathroom design scheme.

design

Ideal Standard offers a range of traditional baths in Idealform, Idealform Plus+ and Idealcast. Whether creating a freestanding-look bathroom with an Idealcast roll top bath, or a more built-in look, there are designs and sizes to suit.

Each bath comes with our 25-year guarantee.

Connect

Choose your style

The Connect range makes it easy to find the right shower enclosure for you – they're all cleverly designed to be easy to install and fit into the tightest of spots. All enclosures are unbeatable on quality too – they're designed for living, featuring 4mm glass and having each been tested to a minimum of 20,000 uses – meaning that these good looks are engineered to last.

Connect Quadrant enclosure
Easy installation is the watchword of the Connect range, even the Quadrant's curved doors can be adjusted after installation for an optimum fit. Shown here with Trevi TT Ascari valve and Moonshadow fixed overhead shower kit. Available sizes: 800 x 800 and 900 x 900mm.

See p190-195 for the complete Connect range

Connect Corner enclosure

It's always nice to have options.

Connect is a flexible range which is designed to fit any space between 700 and 1200mm in length. With a choice of pivot, slider, infold or quadrant doors, Connect gives total flexibility to suit any installation. Perfecting a beautiful bathroom couldn't be easier as Connect is available in satin silver or gloss white frame finish complete with either clear or modesty safety glass for extra peace of mind.

Right: **Tipica Alcove Slider** Shown here with the Trevi TT Ascari valve and Trevi Moonshadow BC shower kit. Available size: 1200mm.

Tipica Alcove enclosures

With simple good looks, ease of access and installation, style and quality does not have to come at a premium. The Tipica range is designed for real life – all our enclosures meet or exceed all relevant UK and European standards.

See p195-197 for the complete Tipica range

Idealite low profile shower trays

These slim, lightweight trays with a height of just 45mm complement Ideal Standard shower enclosures. Every tray comes complete with a 90mm waste and for complete flexibility of installation, there are tray options with integral upstands to allow for tiling to the surface of the tray.

- a Rectangular Idealite tray
- b Square Idealite tray
- c Quadrant Idealite tray
- d Offset Quadrant Idealite tray
- e Pentagon Idealite tray

Trays are available in a range of sizes, with and without upstands. Please see pages 198-199 for full details.

Riser tray kit

Idealite shower trays can be fitted with risers when pipework is above floor level. Once in position the tray is easily levelled by adjusting the height of each leg.

See p198-199 for more information

Integral upstands

The range includes shower trays with integral upstands. The upstand is designed to be tiled over and allows for tiling down to the shower tray surface (see above). Where an upstand is not required around the whole tray, a roll of flexible adhesive upstand is available to purchase which can be cut to size as required.

design

Light and easy

Idealite low profile shower trays are substantially lighter than conventional shower trays. With a height of just 45mm, they are strong and durable with contemporary good looks.

innovation

Complete shower experience

Our showers' superior technology is focused on the welfare of your family and the environment, with features such as thermostatic control, cool-body construction and water saving devices. Ideal Standard offers a five-year guarantee on an extensive collection of shower valves, shower kits and accessories and with Trevi technology you get total reliability and quality for a great shower, every time. For more information, please call 0800 590 311 for an Ideal Standard Showers brochure.

Innovation

TT Active

The beautifully clean and contemporary lines of the TT Shower Collection mirror the meticulous technology at the heart of their design. The temperature handle delivers precise thermostatic control, for total safety.

Twin Sealing system

The built-in TT Active mixer (above) is simple and easy to install. A water proof foam seal within the faceplate sealing gasket compresses to form a flexible seal over uneven surfaces. The second seal fits into the tiling trim surrounding the valve in the wall providing an additional seal against water penetration – the perfect choice for uneven surfaces such as handcrafted tiles or mosaics.

performance

Shower fittings

Alto Ecotherm

Alto Ecotherm is as simple to install as it is to operate and looks great on any bathroom wall. With its built-in safety controls and Cool Body technology, it's ideal for families. Shown here, Alto Ecotherm exposed shower valve, fast fix wall bracket and three-function shower kit.

Mixers and Taps

Mixer and tap fittings are an important element in bathroom design. This collection gives you a wide choice in fittings, ranging from contemporary to traditional Victorian styles and a comprehensive choice of finishes. Ideal Standard has used top designers from all over the world to design each collection with individuality and creativity. This attention to design married with technological innovation ensures that Ideal Standard taps and mixers add the finishing touch to any bathroom.

Water saving and safety solutions

1 CLICK technology

2 Ceramic Disc technology

3 Thermostatic control

4 Temperature limit stop

5 Idealfill

6 TopFix installation

1 CLICK technology

The single lever basin mixer and bidet mixer incorporate a CLICK feature that encourages water saving – the user lifts the handle until they feel a slight resistance. This resistance informs the user that the fitting is delivering only 50% of its maximum flow potential. Lifting the handle further enables the fitting to deliver maximum flow. CLICK technology is available on Ceramix and Ceraplan.

2 Ceramic Disc technology

The multi-port cartridge brings a unique feature for easy temperature control. A single lever controls the pressure and temperature within a unique comfort zone, between 30-45°C. This gives more sensitive control and provides smooth effortless handle operation even at high pressures. See fig.1-4 near left.

3 Thermostatic control

The Cool Body innovation ensures the fitting remains safe to touch, whilst thermostatic control ensures that water temperature is maintained for total comfort and safety. This means you and your children are safe regardless of any changes in water usage elsewhere in the home. Available on Active.

4 Temperature limit stop

The Temperature Limit Stop can be pre-set in any of four positions to provide extra safety. The safety stop feature on all single lever models limits the mixer delivering water in a fully opened hot position.

5 Idealfill

A new concept in bath filling, Idealfill fittings may be mounted on or around the bath or on the wall, independently of the filler, without the need for a conventional spout. The water comes from the combined filler and overflow. This enables you to turn the water on and off from a convenient place without having to stretch around a shower screen or alcove. Idealfill is a low pressure product and will work with the majority of domestic systems delivering 23 litres of water per minute – faster than any other bath filling system. Currently available in Cone.

6 TopFix installation

The Academy, Ceramix, Ceraplan SL, Disc and Duo and Active mixer ranges incorporate this new system which has an innovative patented feature, enabling the mixer to be fitted from above the basin. This avoids the difficulty of tightening the fitting in the awkward space beneath the basin, simplifying and speeding up the installation time. The matching bidet mixer is also available with the easy fit system.

Brass fittings

Cast brass body fully compliant with European standards.

Easy maintenance

Removable outlet nozzle for easy maintenance or upgrade.

Ideal Standard leads the way through technological innovation to ensure fittings are easy to install and maintain, even in hard water or low pressure areas. Many of the great engineering advances in tap manufacture were originated by Ideal Standard. These include Ceramic Disc technology, which controls water flow and temperature with impeccable precision, single lever operations which offer smooth, temperature-controlled water, dual controls for mixer bodies, and quarter turn operations for taps.

Academy
Basin mixer with pop-up waste.

Below right: Two tap hole bath filler.

Academy

Designed by Seymour Powell, Academy is inspired by powerful architectural forms. The distinctive cone handle is integrated into the whole, making the spout the visual focus. The design of Academy is an exercise in controlling both surface and line to create geometrically constructed forms with natural flowing lines. Academy uses Ceramic Disc technology – a ‘no drips’ guarantee and the quarter turn ‘thumb action’ handles are easy to use to deliver accurate water temperature and flow control.

See p200 for the complete Academy range

design

Award-winning

Ideal Standard received the Product Design Award 2007 for Active, designed by ARTEFAKT. Achim Pohl and Thomas Fiegl founded ARTEFAKT industriekultur in 1989. In collaboration with the international industry the 10 man design team develops product lines based on a philosophy of simplicity, sensuality and constancy. This has been the basis for the success of their multiple awarded product developments.

See p200-201 for the complete Active range

Active

Designed by ARTEFAKT, Active offers a wide choice of innovative fittings that combine a distinctive design and high performance features to guarantee quality, comfort and ease of use.

Sleek straight lines are complemented by soft gentle contours to create a contemporary look. Multi-port cartridge technology, the TopFix system and a host of other features ensure that all Active fittings provide consistent water pressure and are easy to install. The Cool Body feature on thermostatic fittings provides safe use, especially to vulnerable users.

See p200-201 for the complete Active range

No cold shocks, no scalding surprises. With Active's thermostatic valves ready and waiting to deliver your shower consistently at just the right temperature, you can start to unwind before you've even turned on the tap. Our attention to technical innovation means your daily pampering is nothing short of pure luxury.

Design by ARTEFAKT

Active

Cool Body technology

The exposed thermostatic valve uses Cool Body technology to ensure the fitting remains safe to touch, giving you added peace of mind.

Innovation

See p201-202 for the complete Tratto range

Tratto

The single lever mixer is a practical, elegant design that does away with the clutter of separate taps. Streamlined and compact, Tratto incorporates Ideal Standard Ceramic Disc technology at an affordable price.

Ceramic Disc technology

The multi-port cartridge brings a unique feature for easy temperature control. A single lever controls the pressure and temperature within a unique comfort zone, between 30-45°C. This gives more sensitive control and provides smooth effortless handle operation even at high pressures. See fig.1-4 page122.

performance

Tratto

See p202-203 for the complete Ceramix range

Ceramix

Ceramix is a completely new range of bathroom fittings, beautifully styled and detailed, and incorporating innovative features. The single lever basin mixer and bidet mixer incorporate CLICK technology that encourages water saving. Lifting the handle further enables the fitting to deliver maximum flow. All fittings work at low and high pressure except wall mounted fittings which are high pressure only.

Ceramix
Single lever basin mixer with pop-up waste.
Above left: Two tap hole bath filler.
Left: The Ceramix built-in single lever manual shower valve is designed to coordinate with a range of highly efficient bathroom fittings.

A range of contemporary minimalist taps, mixers and accessories designed by Robin Levien, Royal Designer for Industry. Ceramic discs are used throughout and the single lever bath filler uses the new smaller multi-port cartridge which allows a slimmer profile yet still gives a rapid bath fill.

Cone

See p203-204 for the complete Cone range

Idealfill

A new concept in bath filling, Idealfill fittings (above) may be mounted on or around the bath or on the wall, independently of the filler, without the need for a conventional spout. The water comes from the combined filler and overflow. This enables you to turn the water on and off from a convenient place without having to stretch around a shower screen or alcove. Idealfill is a low pressure product and will work with the majority of domestic systems delivering 23 litres of water per minute – faster than any other bath filling system.

design

Choice of handles

Ergonomic and compact, Waterways CD has an outstanding range of tap handle options including Crystal, Quattro, Studio, Aero, Tipo and Axis.

See p204-206 for the complete Waterways and Waterways CD ranges

Waterways

Waterways (left) is a sleek modern range of contemporary mixers and taps with multiple tap handle options including Crystal, Quattro and Studio, offering flexibility in bathroom design.

Waterways CD

The flowing Waterways design with its Ceramic Disc (CD) technology offers unsurpassed choice in bathroom co-ordination. The Ceramic Disc cartridge mechanism turns the water from the 'off' position to fully 'on' in an ultra smooth quarter turn.

Ceraplan SL

The Ceraplan SL collection is an innovative, beautifully styled range of precision-engineered mixer fittings that is versatile enough to complement many of our porcelain ranges.

For the environmentally conscious, the CLICK cartridge in single lever basin and bidet fittings (see page 122) encourages water saving by providing a helpful reference point when using 50% of the water flow. Our temperature control technology ensures safe hot water and the patented multi-port cartridge inside our bath and shower fittings will guarantee you a drip-free bath or shower. With its sleek, modern design, hidden technology and discreet method of fixing, the Ceraplan range is an ideal choice for any bathroom.

Innovation

CLICK technology

The single lever basin mixer (below) and bidet mixer incorporate a CLICK feature that encourages water saving – the user lifts the handle until they feel a slight resistance. This resistance informs the user that the fitting is delivering only 50% of its maximum flow potential. Lifting the handle further enables the fitting to deliver maximum flow.

Ceraplan

Ceraplan Duo

These fittings combine the superb design characteristics of Ceraplan with delicately sculpted conical handles to create a set of highly tactile fittings that deliver accurate water temperature and flow control. Dual control compression valves control the water flow offering the optimum performance for low pressure installations.

TopFix – simple installation

Enables the mixer to be fitted from above the basin. This avoids the difficulty of tightening the fitting in the awkward space beneath the basin, simplifying and speeding up the installation time.

Innovation

Ceraplan Disc

Elegant styling and sleek design are combined across a range of eight contemporary fittings. Ceramic Disc technology controls water flow with impeccable precision for a long lasting drip free operation.

Duo handles

The distinctive conical handles shown above left on the dual control basin mixer and above on the dual control two tap hole bath filler, are integrated vertically and horizontally to create soft, smooth shapes and natural flowing lines.

design

Innovation

The fast fix bracket

Some wall fixing brackets fit inside the wall so require internal access during their installation. And if their valve is to be mounted on a solid wall then more channelling out is required for the bracket, along with extensive making good. The Alto Ecotherm attaches to the outside of the wall, offering a number of advantages such as no requirement for internal access, a stronger more robust fixing and easier fixes should leaks occur.

See p210-211 for the complete Alto range

Alto

The range features basin fittings that deliver accurate water temperature and flow control and for the environmentally conscious, the single lever basin mixer features Ideal Standards water saving CLICK technology.

If you're looking for a stylish, easy to use shower that's built to last, Alto Ecotherm is in a class of its own. The wall mounted shower valve and bath shower mixer feature the innovative and unique fixing bracket, ensuring a guaranteed quality installation. Their built-in safety controls and cool body make them safe for all the family. The ideal choice for a bathroom on a budget.

Alto

Dual control basin mixer with pop-up waste.

Left: Single lever basin mixer with pop-up waste.

Bottom left: Alto Ecotherm exposed shower mixer, bracket and three-function shower kit.

Plaza
Bath/shower mixer.
Right: Basin pillar taps.

Plaza

The angular grace of Plaza evokes the glamour of the Jazz Age and the range complements Ideal Standard's Art Deco-inspired Plaza porcelain suite. Plaza is the perfect choice for those seeking an Art Deco look for a period house, yet its clean lines will also complement contemporary interiors. With individual pillar taps (below), mixers and the sought-after 'telephone' shower head cradle.

See p212 for the complete Plaza range

Kingston

The Victorian elegance of the Kingston range, with its softly rounded styling, makes it an ideal choice for classical bathrooms. Fittings include the popular 'telephone' shower cradle (shown) and a choice of individual crosshead pillar taps or a mixer body. Available in chromium plated and light gold plated finishes.

Planning your Space furniture bathroom

Follow these simple steps to create your own Space furniture bathroom. A choice of finishes, handles, units and worktops allows you to custom-make the perfect bathroom to suit your needs, taste and bathroom space.

Step 1 Choose your door style

Choose from six different door finishes.

Step 2 Choose your worktop

Choose from five work surface finishes to complement your choice of furniture.

- E4659 () 600mm worktop
- E4660 () 1200mm worktop
- E4661 () 1800mm worktop

() Please quote code for finish required.

Projecting 210mm from the wall.

These can be cut to the required length on site.

Step 3 Space chinaware and baths

See pages 166-169 for the full range.

Our Space basins are specially designed to fit the short projection units to provide the ultimate space.

Space
55cm semi-countertop
basin
One tap hole
Left or right-hand

Space
Back-to-wall WC
suite with seat and
cover. Seat position:
conventional or turned
45° left or right

Space
150 x 70cm Offset corner bath
Left and right-handed versions
available, with optional matching
bath panels

Space
120 x 70cm Bath
with optional matching
bath panels

Step 4 Choose your Space furniture units

The bathroom furniture units are available in a choice of sizes, styles and finishes to conceal clutter and unsightly plumbing. Supplied ready-assembled for convenience and durability, they can be teamed with any of our back-to-wall suites.

Space Furniture units

- A 450mm single door wall unit
- B 600mm double door wall unit
- C 750mm bath unit
- D 450mm WC unit
- E 600mm WC unit
- F 600mm basin unit
- G 600mm right-hand basin unit
- H 600mm left-hand basin unit
- I 300mm base unit

Space 600mm Basin unit

Shown with optional plinth

- E4642 () 600mm basin unit, for use with 55cm semi-countertop basins, E6110, E6111 and E6112

Space 300mm Base unit

- E4645 () 300mm base unit with single door

() Please quote code for finish required.

Space 750mm Bath unit

- E4648 () 750mm bath unit

() Please quote code for finish required.

Scale 1:25

Space Bath panels

- E4649 () 1500mm front bath panel
- E4650 () 1700mm front bath panel
- E4651 () 700mm end bath panel
- E4652 () 750mm end bath panel
- E4653 () 800mm end bath panel
- E4655 () 920mm bath panel top rail
- E4654 () 1940mm bath panel top rail

() Please quote code for finish required.

Step 5 Additional options

Choose from the following options to complete your look.

Space Unit filler panels

- E4662 () 50-160mm basin unit filler panel
- E4663 () 160-800mm WC unit filler panel
- E4664 () 160-800mm wall unit filler panel

Space Flush plinth panels

- E4656 () 600mm flush plinth panel
- E4657 () 900mm flush plinth panel

Space End plinth

- E4658 () End plinth

() Please quote code for finish required.

Step 6 Choose your handles

There is a choice of 10 handles designed to complement all door styles.

Space Handles (singles)

- E4671 GE Cylinder knob, brushed stainless steel (not shown)
- E4671 AA Cylinder knob, chrome
- S4962 AA Metal knob, chrome
- S4966 XS Dimpled handle, matt nickel
- E4672 01 Ceramic knob, white
- S4964 AY Curved bar handle, matt chrome
- S4960 AA Contemporary bar handle, chrome
- S4968 GE Arch handle, brushed stainless steel
- E4670 AA Wave bar handle, chrome
- S5304 AA Traditional bar handle, chrome

Step 1 Choose your door style

Choose from Ellison Maple, Ellison White, Kyoto and Oslo.

Step 2 Choose your worktop

Choose from a range of four work surface finishes to complement your choice of furniture.

Worktop for standard units

Projecting 305mm from the wall:

- S4970 () 700mm worktop
- S4971 () 1500mm worktop
- S4975 () 2400mm worktop

() Please quote code for finish required.

Worktop for vanity units

Projecting 425mm from the wall:

- S4972 () 600mm vanity top

Projecting 535mm from the wall:

- S4973 () 760mm vanity top
- S4974 () 1500mm vanity top

Step 3 Choose your fittings

Choose from a selection of basins, WC suites, baths, mixers and taps and showers to complement your furniture choice.

Step 4 Choose your units

The fitted furniture units are available in a choice of sizes, styles and finishes to conceal clutter and unsightly plumbing. Supplied ready-assembled for convenience and durability, they can be teamed with any of our back-to-wall suites. Handles, worktops and plinths are sold separately.

Bathroom furniture Furniture units

- a 300mm four drawer unit
- b 600/700mm basin unit
- c 600mm WC unit
- d 600mm bidet unit
- e 300/160mm single base unit
- f 600mm double base unit
- g 160/300mm open base unit
- h 300mm tall unit
- i 160mm open wall unit
- j 600mm double wall unit
- k 300/160mm single wall unit
- l 600mm double mirror unit

Please add the following colour reference to the code when ordering: Oslo Maple JC, Kyoto JD, Ellison White JE and Ellison Maple JF.

For worktops add the colour reference: Matt White WD, Maple effect GI and Gloss White WG.

Plinths and fillers are only available in two colour options: Matt White WD and Maple effect GI.

Bathroom furniture pages 60-69

Planning your fitted bathroom

Follow these simple steps to create your own signature bathroom. A choice of finishes, handles, units and worktops allows you to custom-make the perfect bathroom to suit your needs, taste and bathroom space.

Bathroom furniture 300mm four drawer unit

Joy Installation flexibility

Intermediate sized enclosures

To assist with installation problems, the Joy range offers intermediate sized enclosures. This is for situations where the original size of enclosure cannot fit within the space but the next size down is too small.

For example, with a 900 Corner enclosure, if the 900mm tray has been installed but tiling has greatly reduced the enclosure area, then an 850 Corner enclosure can be used instead.

Joy Corner pivot enclosure

Idealite Flat top trays

Flat top installation

The shower tray is placed against a finished wall, with tiling to the top of the tray.

Upstand trays

Idealite Upstand trays

Upstand tray installation

The shower tray is placed against a finished wall, with plasterboard on top of the upstand. The tray is then tiled into the wall by tiling over the upstand onto the tray.

Guarantee

Our confidence in the quality and reliability of Ideal Standard products enables us to guarantee all ceramic products (including accessories) for a lifetime and Idealcast and Idealform acrylic baths for 25 years from date of purchase. Furniture, bath panels, mixers and taps, WC suites and cistern fittings are guaranteed for five years from date of purchase. Parts (including flushvalves) are guaranteed for five years and will be replaced if found to be faulty. Whirlpool bath systems are guaranteed for two years from the date of purchase (including all components). Shower enclosures and bath screens are guaranteed for 10 years from the date of purchase. The guarantee does not cover general wear and tear. Our guarantee is offered on all products that have been used in the manner for which they were intended, and does not apply to any products that have been misused or abused in any way. Products must be installed and cared for in line with our fixing instructions and local water byelaws. The guarantee covers products in domestic use by the consumer and not commercial or business use. In the unlikely event the product fails within the guarantee period, we offer a free replacement or replacement part (or nearest equivalent). Liability is limited to individual products and does not cover consequential loss or damage on installations. When your bathroom has been satisfactorily installed and is working well, please ensure you register your guarantee. The guarantee is transferable – it applies to the product not the purchaser provided guarantee registration details are passed on to the new owner. You can register for guarantees on a bathroom bought on your behalf by a plumber or builder. Applies to UK and Republic of Ireland only. This guarantee does not affect your statutory rights.

Ideal Standard pursues a policy of continuing improvement in design and performance of its products. The right is therefore reserved to vary specifications without notice. Colour reproduction is as accurate as possible within the limitations of the printing process.

A division of Ideal Standard (UK) Ltd. P1311(1) 08/10.

Water efficiency

The BMA is the leading trade association for bathroom manufacturers in the UK. They have introduced a Water Efficient Labelling Scheme which allows you to choose products that meet the BMA standards for water efficiency. Over 200 products from Ideal Standard are part of this scheme, so look out for this logo on our most environmentally friendly WC suites, baths, showers and basin fittings.

Important installation information

A key element in the performance of a bathroom is the quality of the installation. We recommend you use a plumber from a registered association (see below) and consult them right from the start. Your local Ideal Standard stockist may offer a plumbing service or, if not, will be able to recommend a qualified plumber.

Recognised plumbing associations

Association of Plumbing and Heating Contractors (APHC) www.aphc.co.uk

The Institute of Plumbing and Heating Engineering www.iphe.org.uk

Scottish and Northern Ireland Plumbing Employers Federation www.snipef.org.uk
