

Technical data sheet

SH230ASR..

Modulating linear actuators for adjusting air dampers and slide valves in ventilation and air conditioning systems in buildings

- For air dampers up to approx. 3 m²
- Actuating force 450 N
- Nominal voltage AC 100 ... 240 V
- Control: modulating DC 0 ... 10 V, position feedback DC 2 ... 10 V
- · Lenght of stroke 100 or 200 mm, fixed

Overview of types

Туре	Stroke	Operating range	Weight
SH230ASR100	100 mm, fixed	DC 2 10 V ≃ 0 100 mm	1.18 kg
SH230ASR200	200 mm, fixed	DC 2 10 V ≃ 0 200 mm	1.25 kg

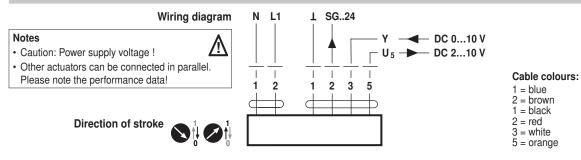

Technical data

Electrical data	Nominal voltage	AC 100 240 V, 50/60 Hz	
	Power supply range	AC 85 265 V	
	Power consumption In operation	3.5 W @ nominal force	
	At rest	1 W	
	For wire sizing	6.5 VA	
	Connection Power supply	Cable 1 m, 2 x 0.75 mm ²	
	Signals	Cable 1 m, 4 x 0.75 mm ²	
Functional data	Actuating force	450 N @ nominal voltage	
	Control Control signal Y	DC 0 10 V, typical input impedance 100 k Ω	
	Operating range	See «Overview of types»	
	Position feedback (Measuring voltage U)	DC 2 10 V, max. 1 mA	
	Position accuracy	±5%	
	Stroke	See «Overview of types»	
	Direction of stroke at Y = 0 V	Reversible with switch 1∓ resp. 0 ±	
	Running time	150 s / 100 mm	
	Sound power level	<50 dB (A)	
Safety	Protection class	II totally insulated 🗆	
	Degree of protection	IP54 in any mounting position	
		NEMA 2, UL Enclosure Type 2	
	EMC	CE according to 2004/108/EC	
	Low voltage directive	CE according to 2006/95/EC	
	Certification	cULus according to UL 60730-1A and UL 60730-2-14 and CAN/CSA E60730-1:02	
		Certified to IEC/EN 60730-1 and IEC/EN 60730-2-14	
	Mode of operation	Type 1	
	Rated impulse voltage Supply	4 kV	
	Control	0.8 kV	
	Control pollution degree	3	
	Ambient temperature range	–30 +50°C	
	Non-operating temperature	–40 +80°C	
	Ambient humidity range	95% r.H., non-condensating	
	Maintenance	Maintenance-free	
Dimensions / Weight	Dimensions	See «Dimensions» on page 3	
-	Weight	See «Overview of types»	

Safety notes		
	 The actuator is not allowed to be used outside the specified field of aircraft or in any other airborne means of transport. Caution: Power supply voltage ! It may only be installed by suitably trained personnel. Any legal regissued by authorities must be observed during assembly. The device may only be opened at the manufacturer's site. It does n can be replaced or repaired by the user. The rotary supports and coupling pieces available as accessories n lateral forces are likely. In addition, the actuator must not be tightly It must remain movable via the rotary support (refer to «Assembly n). If the linear actuator is exposed to severely contaminated atmospher precautions must be taken on the system side. Excessive deposits of prevent the gear rack from being extended and retracted correctly. If not installed horizontally, the gear disengagement pushbutton mathere is no pressure on the gear rod. To calculate the actuating force required for air dampers and slide visupplied by the damper manufacturers concerning the surface, cross installation site and the air flow conditions must be observed. If a rotary support and/or coupling piece is used, losses in the actuator be expected. The device contains electrical and electronic components and is no of as household refuse. All locally valid regulations and requirement. 	ulations or regulations ot contain any parts that nust always be used if bolted to the application. iotes»). re, appropriate of dust, soot etc. can y only be actuated when alves, the specifications as section, design, ation force losses are to t allowed to be disposed
Product features		
Mode of operation	Mode of operation The actuator is controlled with a standard modulating signal of DC 0 10 V and moves to th position defined by the control signal. The measuring voltage U serves for the electrical disp of the damper position 0 100% and as slave control signal for other actuators.	
Manual override	Manual override with push-button possible (the gear is disengaged for as long as the button is pressed or remains locked).	
High functional reliability	The actuator is overload-proof, requires no limit switches and automatically stops when the end stop is reached.	
Accessories		
	Description	Data sheet
Electrical accessories	Positioner SGA24, SGF24 and SGE24	T2 - SG24
Mechanical accessories	Rotary support to compensate lateral forces Z-DS1	T2 - Z-SHA
	Coupling piece Z-KS1	T2 - Z-SHA

Application without transverse forces

If a rotary support and/or coupling piece is

used, losses in the actuation force losses are to

Application with transverse forces

The linear actuator is screwed directly to the housing at three points. Afterwards, the head of the gear rod is fastened to the moving part of the ventilation application (e.g. damper or slide valve).

The coupling piece with the internal thread (Z-KS1) is connected to the head of the gear rod. The rotary support (Z-DS1) is screwed to the ventilation application.

Afterwards, the linear actuator is screwed to the previously mounted rotary support with the enclosed screw. Afterwards, the coupling piece, which is mounted to the head of the gear rod, is attached to the moving part of the ventilation application (e.g. damper or slide valve). The transverse forces can be compensated for to a certain limit with the rotary support and/or

coupling piece. The maximum permissible swivel angle of the rotary support and coupling piece is 10°⊲, laterally and upwards.

Stroke limitation

/!\

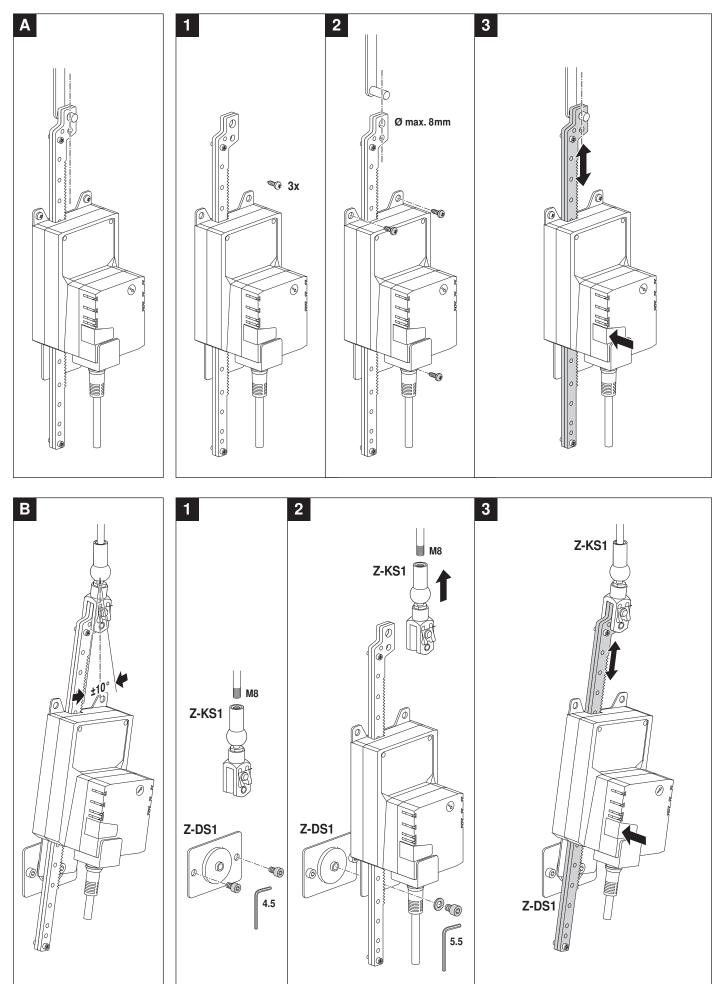

If the stroke limitations are used on the gear rod, the mechanical working range can be exploited from an extension length of 20 mm.
