## **Kinedo Kinemagic from Saniflo, for all the family**

Imagine being able to completely transform your bathroom in just one day, in an easy, hassle-free and affordable manner. Well, thanks to the range of Kinedo shower cubicles from the experts at Saniflo, now you can.

Shower cubicles offer many advantages over shower enclosures, for example. Cubicles provide a swift and efficient showering solution for any shape or size of bathroom. In most cases, you can have a watertight space, complete with the shower, controls and doors fitted and ready to enjoy in less than two hours.

Available as a corner cubicle with a sliding door and a recessed cubicle without a door, the Kinemagic shower cubicle allows you to replace a bath with a fully functioning shower cubicle in just one day\* with no mess or fuss and no re-tiling. It's not an illusion, it really is that simple – bath one day, shower the next.

Replacing the bath with a shower is a growing trend, as more and more people prefer to shower than take a bath. Not only can showering be more cost effective than a bath in terms of saving money to heat water and pay for water bills, but showering is also kinder on the environment as in most cases it takes less water for a good 10-minute shower than filling a bath.

Showers can also be easier for all the family to use and get in and out of. Kinemagic is large enough to comfortably accommodate a parent and a couple of young children, for example, making shower time fun and different.

Kinemagic even comes complete with a fold down seat, so if you want to take the weight off your feet you can. Also included is an attractive thermostatic shower control with fixed overhead and a separate

handset for added flexibility; and, an anti-slip, low level shower tray, so you have everything you need to be up and showering in no time.

A high quality, all-in-one shower cubicle, Kinemagic has been designed to fit in exactly the same space as your old bath - so no re-painting and no structural work or tricky re-plumbing. Cool, sleek glass panels and an attractive anodised finish mean that the Kinemagic is in a class of its own.

Your Kinemagic cubicle will look as great in many years to come after lots of use as it does on day one. As there's no silicone used during installation you don't need to worry about unsightly discolouring and as there are no tiles nor do you have to worry about grubby looking grout that takes time and effort to keep clean.

Leaks are a thing of the past with Kinemagic too. As there are no tiles or need for grout you can rest assured that your Kinemagic cubicle will be completely leak free and as we use Cristal Plus on all glass you're spared from ugly streaks and watermarks. With Kinemagic all you have to do is wipe it clean after use with a soft cloth and that's it.

All Kinedo cubicles are designed, manufactured and tested in our own production plants in France. This means we have complete control over the process and we can maintain the highest standards of quality and service. All our products have a comprehensive two-year guarantee.

For the full range of Kinedo shower cubicles please visit [www.kinedo.co.uk](http://www.kinedo.co.uk)

\*It is possible to fit a Kinemagic in one day with two people. However, this is subject to site situations and the competency of your installer.
