

Pressure Reducing Valves

D1600

CraneFluidSystems have introduced a range of Pressure Reducing Valves, to extend the range of WRAS approved products available for potable water applications.

Simple to install, and adjust, these valves enable control of pressure from boosted cold water supplies to match site requirements.

Materials of construction	
Body	Bronze
Disc	Bronze
Cartridge	Stainless Steel
	Bronze
	Nitrile
Filter	Stainless Steel
Gaskets	Nitrile

The D1600 pressure reducing valves are manufactured in accordance with BS EN 1567.

The stainless steel filter is easily accessible for cleaning.

All units are delivered with a pre-set outlet pressure of 4 Bar. This can be easily adjusted on site, and the adjustment mechanism can then be locked in position to prevent accidental adjustment.

- Pressure Rating: 16 Bar
- Maximum Fluid Temperature: 60°C
- Maximum Inlet Pressure: 16 bar
- Outlet Pressure: 1.5 Bar – 6.0 Bar
- Suitable for:
 - Water
 - Compressed Air
