## Type 402

### Non return valve

### System 02

#### Applications and special features

- Operates in any position
- Minimum head loss
- Silent, reliable sealing, compact
- Exceptional robustness
- Does not generate hammering
- Notch provided for cable to submerged pumps until DN 100.
- Closing system : long back axial guiding for reduced displacement
- Sealing guaranteed by a flat seal
- Return spring

#### Technical description

##### Important notice:

The indicated pressure for the different categories of fluids (L1/L2/G1/G2) is under no condition a guarantee of use. Therefore, it is essential to validate the use of products under given operating conditions. In order to facilitate your choice regarding these new regulatory requirements, Danfoss Socla has put the necessary information concerning products with CE marking, specification sheets and product identification plates at your disposal in the price list (+ see additional explanations on the detachable slip). In addition, the operating instructions are available on our web site [www.danfoss-socla.com](http://www.danfoss-socla.com) or by requesting from our sales department.
